

ABSTRACT OF THE DISCLOSURE

A method and a system for establishing a communication connection between a person seeking communication and a communication partner to whom a personal communication address is allocated. To provide for a correlation between individual 5 identification codes of communication terminals and the personal communication address in a simple and ergonomic manner, the information about which individual identification code is allocated to the personal communication address of the communication partner at this time is read out of a schedule store of the communication partner, for setting up the communication connection.
